# 1. General Specifications

Operating Temp. : min. 0°C ~max. 50°C

Storage Temp. : min. -20°C ~max. 70°C

Dot Pixels :  $320 \times 3$  [R.G.B] (W)  $\times$  240 (H) dots

Dot Size : 0.1 (W)  $\times$  0.34 (H) mm

Dot Pitch :  $0.12 \text{ (W)} \times 0.36 \text{ (H)} \text{ mm}$ 

Viewing Area : 120.0 (W)  $\times$  90.0 (H) mm

Outline Dimensions :  $168.0^*$  (W)  $\times$  111.0 (H)  $\times$  9.4 max. (D) mm

\* Without LED Cable

Weight : 276g max.

Viewing Angle : 12:00

Data Transfer : 8-bit parallel data transfer

Backlight : LED

Drawings : Dimensional Outline UE-312546B

RoHS regulation : To our best knowledge, this product satisfies material

requirement of RoHS regulation.

Our company is doing the best efforts to obtain the equivalent certificate from our suppliers.

Lead free : Our product corresponds to lead free.

Lead free is defined as below:

1) The solder used in the LCD module.

2) Electrical components (Terminal section) used in the LCD module.

Any lead used within the electrical component does not apply to

Page 3/19

our module definition of lead free.

# 2. Electrical Specifications

# 2.1. Absolute Maximum Ratings

VSS=0V

Parameter	Symbol	Conditions	Min.	Max.	Units
Supply Voltage	VCC1-VSS	-	-0.3	6.5	V
	VCC2-VSS				
Contrast Adjust Voltage	V <sub>vadj</sub>	-	-0.3	2.5	V

### 2.2.DC Characteristics

Ta=25°C, VSS=0V

Parameter	Symbol	Conditions	Min.	Тур.	Max.	Units
Supply Voltage	VCC1-VSS	-	4.5	5.0	5.5	V
	VCC2-VSS		2.5	3.0	3.5	
Contrast Adjust	V VADJ	Duty=1/240, Bias=1/13	1.5	2.0	2.5	v
Voltage		VCC1=5.0V				
High Level	ViH	VCC1=3.0/5.0V±10%	0.8 VCC1	-	VCC1	V
Input Voltage						
Low Level	VIL	VCC1=3.0/5.0V±10%	0	-	0.2VCC1	V
Input Voltage						
Supply Current	Icc1	VCC1-VSS=3.0V	-	100	120	mA
		V VADJ=2.0V				
		Checker Board pattern				
		VCC1-VSS=5.0V		55	82.5	mA
		V VADJ=2.0V				
		Checker Board pattern				

### 2.3. Characteristics of Touch Screen

Parameter	Conditions	Min.	Тур.	Max.	Units
Applied Rating Voltage	-	-	-	7.0	V
Resistance of Terminal	X Electrode	300	-	900	
Electrodes	Y Electrode	200	-	650	Ω
Linearity	-	-	-	1.5	%
Insulation Resistance	V <sub>DC</sub> =25V	10	-	-	MΩ
Surface Hardness	According to JIS-K5400	3	-	-	Н
Chattering	At connector Pin	-	-	10	mS

Test condition: Touch screen is placed horionally in a vessel and no power is supplied to T/P.

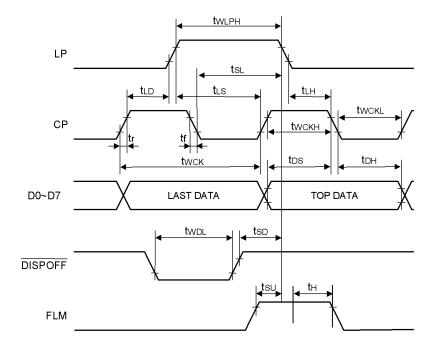

Normal state is temperatire: 2.5±10°C, relative humidity: 60±25°C

F-51900NCU-LW-AHN OPTR	REX CORPORATION	Page 4/19
------------------------	-----------------	-----------

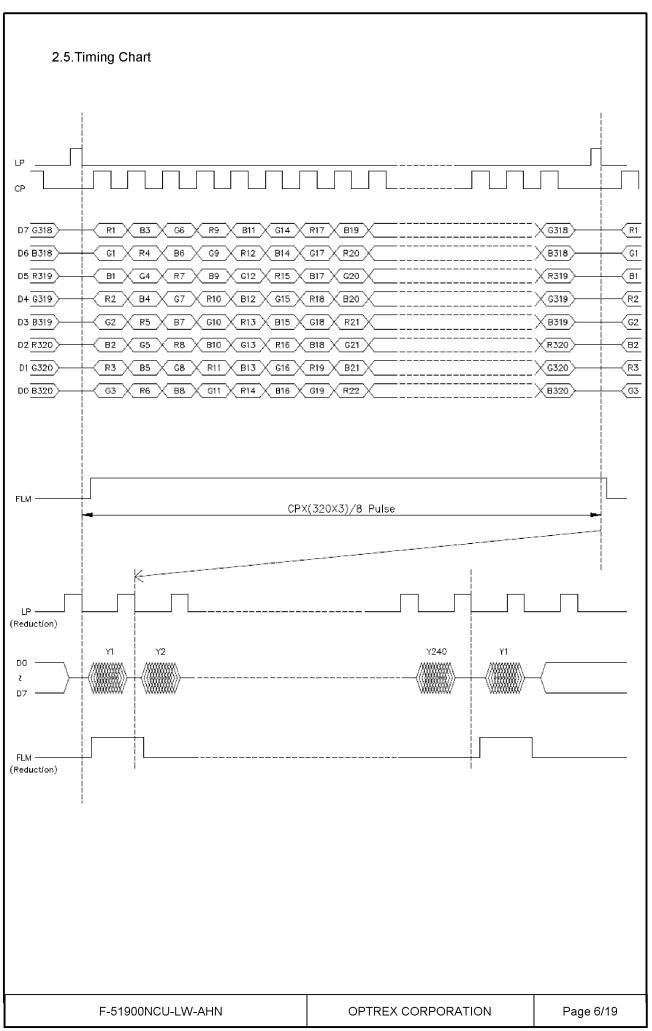

# 2.4.AC Characteristics

 $V_{CC}$ =3.0/5.0V±10%

Parameter	Symbol	Min.	Max.	Units
Clock Pulse Cycle Time	t <sub>wck</sub>	66/40	-	ns
Clock Pulse High Level Width	twckh	23/12	-	ns
Clock Pulse Low Level Width	twckl	23/14	-	ns
Latch Pulse High Level Width	t <sub>WLPH</sub>	30/15	-	ns
CP → LP Rise Time	t <sub>LD</sub>	10/5	-	ns
CP → LP Fall Time	<b>t</b> <sub>SL</sub>	30/25	-	ns
LP → CP Rise Time	<b>t</b> <sub>LS</sub>	30/25	-	ns
LP → CP Fall Time	t <sub>LH</sub>	30/25	-	ns
Clock Pulse Rise/Fall Time	t <sub>r</sub> , t <sub>f</sub>	-	50	ns
Data Setup Time	t <sub>DS</sub>	10/5	-	ns
Data Hold Time	t <sub>DH</sub>	25/15	-	ns
DISPOFF Low Level Width	t <sub>WDL</sub>	1.2	-	μS
DISPOFF Cancellation Time	t <sub>sD</sub>	100	-	ns
FLM Setup Time	<b>t</b> su	30	-	ns
FLM Hold Time	t <sub>H</sub>	50	-	ns

# 2.6. Comparison of Display and Data

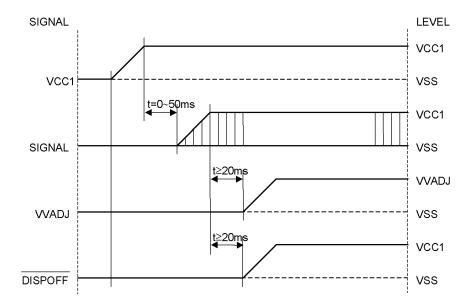

# STARTING DOT

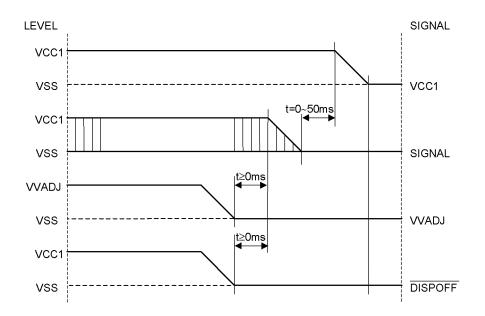

- 1) The eight (8) bit data transfer interface
- 2) The D0 is for LSB and the D7 is for MSB.

### 2.7. Power Supply ON/OFF Sequence

# 2.7.1.ON Sequence

### 2.7.2.OFF Sequence

Please maintain the above sequence when turning on and off the power supply of the module

If DISPOFF is supplied to the module while internal alternate signal for LCD driving (M) is unstable, DC component will be supplied to the LCD panel. This may cause damage the LCD module.

F-51900NCU-LW-AHN	OPTREX CORPORATION	Page 8/19
-------------------	--------------------	-----------

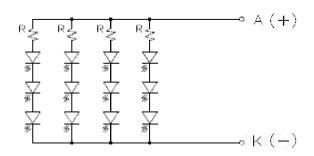

### 2.8. Lighting Specifications

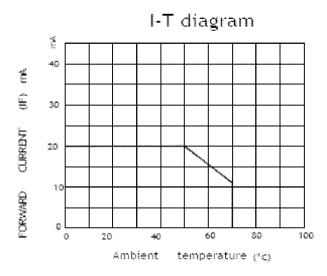

Ta=25°C

Parameter	Symbol	Conditions	Min.	Тур.	Max.	Units
Peak Forward Current	lf	-	-	-	120	mA
Forward Voltage	VF	I <sub>F</sub> =72mA	-	-	15	V
		(18mA/ line)				
AllowableReverse Voltage	lR	-	-	12	-	V
Forward Current	lF		-	72	80	mA
LED Power Dissipation	Po	-	-	-	0.96	W
Backlight Life time	_	Note 1,2,3	-	40,000	_	Hrs

- Note 1 : Backlight life time is defined as time period that the acutual luminance becomes 50% orlower of its initial value.
- Note 2 : Bakclight life time depends on the ambient temperature.

  The term "Backlight Life Time" is defined as room temperature, or 25°C.
- Note 3: Backlight life time will decrease under high temperature.

Each LED dice Max. forward current is 20mA at 0~50°C

# 3. Optical Specifications

### 3.1. Optical Characteristics

Ta=25°C, 1/240 Duty, 1/13 Bias,  $V_{vadj}$ =1.7 V (Note 4),  $\theta$ = 0°,  $\phi$ =-°

Pa	rameter	Symbol	Conditions	Min.	Тур.	Max.	Units
Contrast R	atio Note 1	CR	θ <b>= 0</b> °,φ <b>=-</b> °	17	25	-	
Chromaticity(White)		х	-	-	0.30	-	
		у	-	-	0.31	-	
Viewing An	gle		Shown in 3.2				
Response	Rise Note 2	Том	-	-	300	450	ms
Time	Decay Note 3	Toff	-	-	100	150	ms

Note 1 :Contrast ratio is definded as follows.(CR = LOFF / LON)

Lon: Luminance of the ON segments

Loff: Luminance of the OFF segments

Note 2 :The time that the luminance level reaches 90% of the saturation level from 0% when ON signal is applied.

Note 3 :The time that the luminance level reaches 10% of the saturation level from 100% when OFF signal is applied.

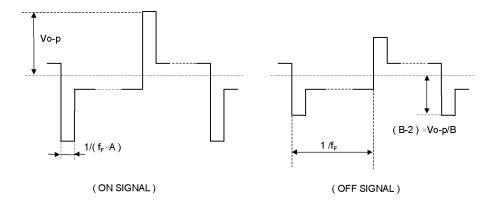

Note 4 : Definition of Driving Voltage Vod

Assuming that the typical driving waveforms shown below are applied to the LCD Panel at 1/A Duty - 1/B Bias (A: Duty Number, B: Bias Number). Driving voltage VoD is definded as follows.

 $V_{OD} = (Vth1+Vth2) / 2$ 

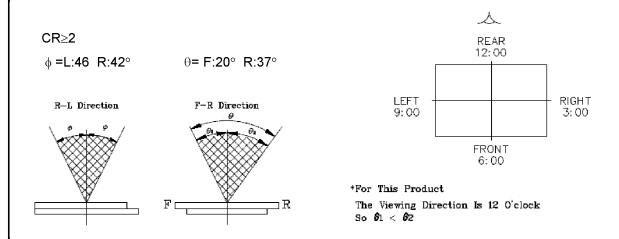

Vth1: The voltage Vo-P that should provide 90% of the saturation level in the luminance at the segment which the ON signal is applied to.

Vth2: The voltage Vo-P that should provide 10% of the saturation level in the luminance at the segment which the OFF signal is applied to.

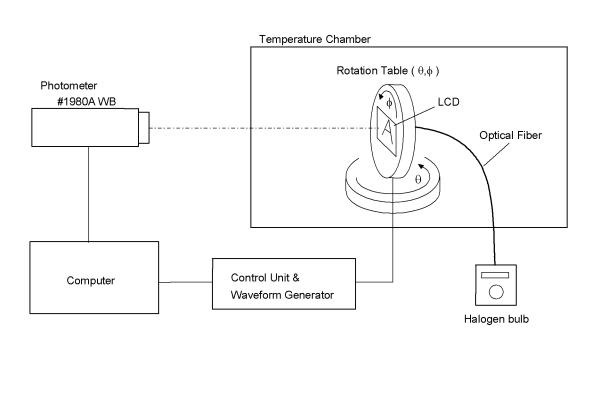

# 3.2. Definition of Viewing Angle and Optimum Viewing Area

\*Driving condition: 1/240 Duty, 1/13Bias, V<sub>vadj</sub>=1.7 V, f<sub>F</sub>= 70Hz

# 3.3.System Block Diagram

# 4.<u>I/O Terminal</u>

# 4.1.Pin Assignment

# <u>CN1</u>

No.	Symbol	LEVEL	Function
1	D0		
₹ .	₹	H/L	Display Data
8	D7		
9	DISPOFF	H/L	Display Control Signal H : Display on L : Display off
10	FLM	H/L	First Line Marker
11	LP	H→L	Data Latch Signal
12	СР	H→L	Clock Signal for Shifting Data
13	М	H/L	Alternate Signal for LCD Drive
14	VCC1	-	Power Supply for LCD Drive
15	VSS	-	Power Supply (0V, GND)
16	VSS	-	Power Supply (0V, GND)
17	VCC2	-	Power Supply for LCD Drive
18	VVADJ	_	Voltage Level for LCD Contrast Adjustment

# <u>CN2</u>

No.	Symbol	LEVEL	Function
1	Α	-	Power Supply for LED (+)
2	NC	-	No connection
3	NC	-	No connection
4	К	-	Power Supply for LED (-)

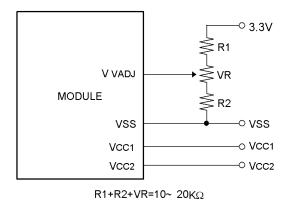

# <u>CN3</u>

	ı		
No.	Symbol	LEVEL	Function
1	DOWN	-	Down Direction
2	LEFT	-	Left Direction
3	UP	-	Up Direction
4	RIGHT	-	Right Direction

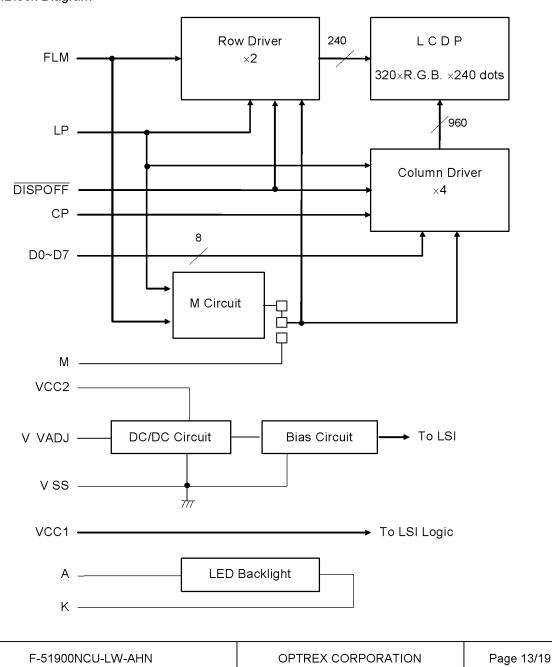

F-51900NCU-LW-AHN	OPTREX CORPORATION	Page 12/19
-------------------	--------------------	------------

### 4.2. Example of Power Supply

It is recommended to apply a potentiometer for the contrast adjust due to the tolerance of the driving voltage and its temperature dependence.

# 4.3.Block Diagram

# 5. Test

No change on display and in operation under the following test condition.

Conditions: Unless otherwise specified, tests will be conducted under the following condition.

Temperature: 20±5°C Humidity: 65±5%RH

tests will be not conducted under functioning state.

No.	Parameter	Conditions	Notes
1	High Temperature Operating	50°C±2°C, 96hrs (operation state)	
2	Low Temperature Operating	0°C±2°C, 96hrs (operation state)	1
3	High Temperature Storage	60°C±2°C, 96hrs	2
4	Low Temperature Storage	-20°C±2°C, 96hrs	1,2
5	Damp Proof Test	40°C±2°C,90%RH, 96hrs	1,2
6	Vibration Test	Total fixed amplitude : 1.5mm	3
		Vibration Frequency : 10~55Hz	
		One cycle 60 seconds to 3 directions of X, Y, Z	
		each 15 minutes	
7	Shock Test	To be measured after dropping from 60cm high	
		the concrete surface in packing state.	
		Dropping method corner dropping A corner : once Edge dropping B,C,D edge : once Face dropping E,F,G face : once	

Note 1: No dew condensation to be observed.

Note 2 :The function test shall be conducted after 4 hours storage at the normal Temperature and humidity after removed from the test chamber.

Note 3: Vibration test will be conducted to the product itself without putting it in a container.

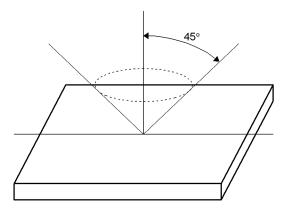

# 6. Appearance Standards

# 6.1.Inspection conditions

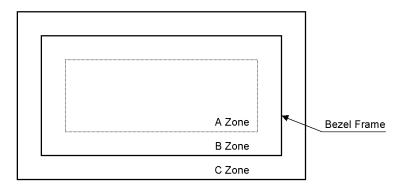

The LCD shall be inspected under 40W white fluorescent light.

The distance between the eyes and the sample shall be more than 30cm.

All directions for inspecting the sample should be within 45° against perpendicular line.

# 6.2. Definition of applicable Zones

A Zone: Active display area

B Zone : Area from outside of "A Zone" to validity viewing area

C Zone : Rest parts

A Zone + B Zone = Validity viewing area

# 6.3.Standards

No.	Parameter	Criteria					
		(1) Round Shape					
			Zone		eptable Nun	nber

# 7. Code System of Production Lot

The production lot of module is specified as follows.

# 8. Type Number

The type number of module is specified as follows.

# F-51900NCU-LW-AHN

# 9. Applying Precautions

Please contact us when questions and/or new problems not specified in this specifications arise.

F-51900NCU-LW-AHN	OPTREX CORPORATION	Page 17/19
-------------------	--------------------	------------

### 10. Precautions Relating Product Handling

The Following precautions will guide you in handling our product correctly.

- 1) Liquid crystal display devices
  - 1) The liquid crystal display device panel used in the liquid crystal display module is made of plate glass. Avoid any strong mechanical shock. Should the glass break handle it with care.
  - 2) The polarizer adhering to the surface of the LCD is made of a soft material. Guard against scratching it.
- 2) Care of the liquid crystal display module against static electricity discharge.
  - 1) When working with the module, be sure to ground your body and any electrical equipment you may be using. We strongly recommend the use of anti static mats (made of rubber), to protect work tables against the hazards of electrical shock.
  - 2) Avoid the use of work clothing made of synthetic fibers. We recommend cotton clothing or other conductivity-treated fibers.
  - 3) Slowly and carefully remove the protective film from the LCD module, since this operation can generate static electricity.
- 3) When the LCD module alone must be stored for long periods of time:
  - 1) Protect the modules from high temperature and humidity.
  - 2) Keep the modules out of direct sunlight or direct exposure to ultraviolet rays.
  - 3) Protect the modules from excessive external forces.
- 4) Use the module with a power supply that is equipped with an overcurrent protector circuit, since the module is not provided with this protective feature.
- 5) Do not ingest the LCD fluid itself should it leak out of a damaged LCD module. Should hands or clothing come in contact with LCD fluid, wash immediately with soap.
- 6) Conductivity is not guaranteed for models that use metal holders where solder connections between the metal holder and the PCB are not used. Please contact us to discuss appropriate ways to assure conductivity.
- 7) For models which use CFL:
- 1) High voltage of 1000V or greater is applied to the CFL cable connector area. Care should be taken not to touch connection areas to avoid burns.
- 2) Protect CFL cables from rubbing against the unit and thus causing the wire jacket to become worn.
- 3) The use of CFLs for extended periods of time at low temperatures will significantly shorten their service life.
- 8) For models which use touch panels:
  - Do not stack up modules since they can be damaged by components on neighboring modules.
  - 2) Do not place heavy objects on top of the product. This could cause glass breakage.
- 9) For models which use COG,TCP,or COF:
  - 1) The mechanical strength of the product is low since the IC chip faces out unprotected from the rear. Be sure to protect the rear of the IC chip from external forces.
  - 2) Given the fact that the rear of the IC chip is left exposed, in order to protect the unit from electrical damage, avoid installation configurations in which the rear of the IC chip runs the risk of making any electrical contact.

F-51900NCU-LW-AHN OPTREX CORPORATION Page 18/19
-------------------------------------------------

- 10) Models which use flexible cable, heat seal, or TCP:
  - 1) In order to maintain reliability, do not touch or hold by the connector area.
  - 2) Avoid any bending, pulling, or other excessive force, which can result in broken connections.
- 11) In case of buffer material such as cushion / gasket is assembled into LCD module, it may have an adverse effect on connecting parts ( LCD panel-TCP / HEAT SEAL / FPC / etc., PCB-TCP / HEAT SEAL / FPC etc., TCP-HEAT SEAL, TCP-FPC, HEAT SEAL-FPC, etc.,) depending on its materials.
  - Please check and evaluate these materials carefully before use.
- 12) In case of acrylic plate is attached to front side of LCD panel, cloudiness (very small cracks) can occur on acrylic plate, being influenced by some components generated from polarizer film. Please check and evaluate those acrylic materials carefully before use.
- 13) Flickering due to optical interference may occur by combination of a) LCD driving frame frequency decided by either internal oscillator in driver IC or external clock input by the customer and b) lighting frequency of either backlight or other light sources. Please evaluate enough at the environment of actual use, and decide the driving condition that does not cause flickering.
- 14) Please be advised that do not apply Direct Current (DC) voltage to the LCD. If DC voltage is applied to the LCD, then it may cause poor display quality.

#### 11. Warranty

This product has been manufactured to your company's specifications as a part for use in your company's general electronic products. It is guaranteed to perform according to delivery specifications. For any other use apart from general electronic equipment, we cannot take responsibility if the product is used in medical devices, nuclear power control equipment, aerospace equipment, fire and security systems, or any other applications in which there is a direct risk to human life and where extremely high levels of reliability are required. If the product is to be used in any of the above applications, we will need to enter into a separate product liability agreement.

- 1) We cannot accept responsibility for any defect, which may arise from additional manufacturing of the product (including disassembly and reassembly), after product delivery.
- 2) We cannot accept responsibility for any defect, which may arise after the application of strong external force to the product.
- 3) We cannot accept responsibility for any defect, which may arise due to the application of static electricity after the product has passed your company's acceptance inspection procedures.
- 4) When the product is in CFL models, CFL service life and brightness will vary according to the performance of the inverter used, leaks, etc. We cannot accept responsibility for product performance, reliability, or defect, which may arise.
- 5) We cannot accept responsibility for intellectual property of a third party, which may arise through the application of our product to your assembly with exception to those issues relating directly to the structure or method of manufacturing of our product.
- 6) Optrex will not be held responsible for any quality guarantee issue for defect products judged as Optrex-origin longer than 18 (eighteen) months from Optrex production or 1(one) year from Optrex, Optrex America, Optrex Europe delivery which ever comes later.
